

# CALL FOR PAPERS

## DSC 2023 EUROPE VR

### DRIVING SIMULATION & VIRTUAL REALITY CONFERENCE & EXHIBITION

The DSC Conference gathers driving simulation specialists from the industrial and academic communities as well as commercial simulation providers. This 22<sup>nd</sup> edition follows that of 2022, held in Strasbourg, in a hybrid version with 300 participants on site and 40+ exhibitors. Both physical and remote participants came from all around the world from about 20 different countries of Europe, America and Asia.

**This year's edition will be held in Antibes from September 6<sup>th</sup> to 8<sup>th</sup>, 2023.** Topics will include state of the art in driving simulation technology, research and developments, extended with progressively merging virtual reality (VR) developments. This year program will also give an enlarged place for simulation tools for autonomous and connected vehicles along with advanced driving assistance system (ADAS) applications. Human factors and motion rendering nevertheless will remain the now traditional axis of the conference.

Please note that there is a **separate call for Product Solution papers**, introduced in the 2018 edition of our conference, which is a recognized part of our conference.

**The deadline for abstract submission is set to December 31<sup>st</sup>, 2022.** You are welcome to the DSC 2023 Europe Conference organized by the Driving Simulation Association, Arts et Métiers Institute of Technology and the Gustave Eiffel University, with the support of Renault, on September 6<sup>th</sup>-8<sup>th</sup> !
